

Neringa

Aqwella *****

The main item of the Neringa collection is a suspended vanity unit of 80 cm width with a curved facade. Front and the sides of the furniture are made from MDF covered with five layers of glossy enamel.

The top drawer has a plastic tray with three storage compartments. Blum drawer guides ensure smooth and soft closing. Those Blum systems have an eternal guarantee. The interior is finished in a special color (Eolo) that imitates the fabric. The furniture is equipped with an exclusive washbasin with a trapezoid-shaped bowl. The front side of washbasin follows the curved shape of the facade. The drain area is covered with a decorative insert. The washbasin is made of marble cast. The metal chrome handle is engraved with the AQWELLA logo. Touch switches on the Neringa mirror allow you to turn on heating and lighting both separately and together. The led lamp of the mirror cabinet gives a soft and uniform light. This also illuminates the space inside the cabinet. Touch switch works after hand movement and it has a light controller.

W – White high gloss
